## **SATELLITE DISH INSTALLATIONS FOR ROSSMOOR**

All residents who wish to have a satellite dish installed in Rossmoor must apply for an alteration permit from their Mutual. The dish must not exceed one meter ( roughly 39 inches ) in diameter. No installations will be allowed until the Mutual has reviewed and approved the application. An on site meeting will be required to determine an allowable location of the dish and the routing of the associated cable. Once all criteria has been met and the resident has paid for and received their permit the installation will be allowed to proceed. All cable must be secured tightly, run in a horizontal and/or vertical manor so as not to detract from the aesthetics of the building. A final inspection is required by the alteration department of the Mutual Operations Division.
